

# Rasmus Buhl Jakobsen

## FRONTEND DEVELOPER

[www.rasmusbuhl.com](http://www.rasmusbuhl.com)

### Profile

I am a passionate and self-taught frontend developer, who loves his craft. I program and design websites and web applications with Javascript, HTML and CSS. I am used to be part of every step in the development process, starting with an aspiring idea until the product is thoroughly tested and launched.

My focus lies heavily on the symbiosis between design and functionality, creating the best possible experience for the user. Thus have I learned good programming practice in coherence with design principles.

Through my education in IT, communication and new media have I learned how the Internet works and what safety measures to consider. This is a great foundation for creating awesome, intuitive and safe web solutions, that benefits companies as well as end users.

### Language

- Danish Native
- English Fluid
- Norwegian Basic
- Swedish Basic

### IT - Qualifications

Javascript - CSS - HTML - React - Redux - SASS - Bootstrap - Node Js - AJAX - Axios - Wordpress - Git and Github - Firebase - Adobe Illustrator - Adobe XD - Adobe Photoshop - Figma

### Work experience

#### Internal IT-support, Ipsos Denmark A/S Copenhagen

November 2017 - June 2020

- Hardware support (pc's, docking stations, servers etc.) - Software support (Windows, applications, websites, Wordpress).
- Solo supporter for over 60 employees in Copenhagen.
- Direct contact with users and administrative assignments.
- Optimizing work processes.
- Purchase of IT-equipment and replacement of old systems.
- Compression of focus group video recordings.

#### Internal IT-support, Bupa Denmark A/S Copenhagen

January 2018 - March 2020

- Remote support by phone and email with Team Viewer of employees, across the whole world (Denmark, England, The US, India etc.).
- Part of a support-team of four people, supporting over 300 employees in Copenhagen alone.
- Hardware support (pc's, docking stations, printers etc.) and software (Windows, applications, system programs etc.).
- Transition from old phone system, to online application based phone system (PureCloud).

## Abilities

- Programme responsive websites and web applications.
- Design websites, logos, artwork etc.
- Develop dynamic and static websites.
- Develop one-page and multi-page websites.
- Write easy to read code that is maintainable.
- Develop with frameworks like React.
- Code custom animations with CSS and GSAP.
- Testing and optimization of code.
- Develop with Web API's.

## Hobbies

I love most sports and recently I have enjoyed playing Spikeball as well as boulder climbing. I also use running and working out as a way to relax and disconnect. Philosophy is another great interest of mine, and I enjoy having interesting conversations about complex subjects such as morality, religion, wellbeing and alike. I have read some interesting books on these subjects by authors like Sam Harris and Jordan Peterson. These exciting conversations could very well be had while drinking a good craft beer which I enjoy together with my girlfriend and my friends. We find pleasure in visiting various beer bars and taste all of the different craft beers that are being brewed around the city.

## Education

**Bachelordegree in IT, communication and new media,  
Aalborg University Copenhagen**

**2014 - 2018**

- Focus on developing applications and programs in small teams.
- Lectures in computer technology, programming, software design, user interaction, discrete mathematics, linear algebra, statistics and probability, distributed systems, cryptography, network and application security, databases, future network technologies, business structure etc.

**High School, Fredericia High School**

**2009 - 2012**

## Work-related skills

### Creativity

- I think outside the box, and urges to do away with the expected.
- I have a great visual understanding, that combined with great functionalities results in satisfying products.

### Approach

- Structured regarding planning and debugging.
- Creative when solving problems and implementing functionalities.

### Professionally

- Extensive insight in the field of computers, the Internet, software and how people interact with it.
- I always stay updated about new trends in web development - new technologies, new functionalities and new standards.

### Socially

- I am a team player convinced that the dynamic between me and my colleagues has to be pleasant, rewarding and effective.
- It is important that colleagues exchange ideas, knowledge and experiences.
